## **VISUAL FIELD ANALYSIS**

Visual field analysis is highly recommended for all of our adult patients (age 16 and older) at the time of the routine eye examination. This test allows the Doctor to evaluate the strength of the vision surrounding the central fixation point.

Progressive health problems affecting the eyes or the visual pathway through the brain can cause a weakness in the field of vision. Visual field analysis can uncover weaknesses, often long before any sign or symptom of eye disease becomes apparent.

The visual field screening is one of the most important test that we can offer for the early detection of:

- ❖ glaucoma
- ❖ retinal and optic nerve disease
- ❖ visual pathway disorders, which can include brain tumors, aneurysms, and strokes.

The visual field evaluation generally takes about 10 minutes. Dilation of the eyes is NOT required.

**THE ADDITIONAL FEE FOR THIS ROUTINE SCREENING IS \$30 AND IS NOT USUALLY COVERED BY YOUR VISION CARE INSURANCE.** (However, if certain medical conditions such as glaucoma, diabetes or retinal problems do exist, medical insurance will usually pay for required more complex fields. These fields can range up to \$85.

**I DO** want to include this testing \_\_\_\_\_ (please initial)

**I DO NOT** want this testing to be done \_\_\_\_\_ (please initial)

## **DILATION**

Dilation of the eye (pupils) requires the use of eyedrops, and allows us to view a greater area of the retina (back of the eye). Driving after dilation is not usually a problem (we will provide sunglasses), reading may be a problem for 4-5 hours after dilation, depending on your prescription.

**Diabetics should be dilated yearly.**

There is NO additional charge for dilation unless another visit is required (\$45 office visit applies).

**I DO** want my eyes dilated today \_\_\_\_\_ (please initial)

**I DO NOT** want my eyes dilated today \_\_\_\_\_ (please initial)

**I DO** want my eyes dilated, but not today \_\_\_\_\_ (please initial - \$45 office visit applies)

## **Vision Wellness Screening Test with the RTA 5**

Technology is amazing! We now have an instrument capable of taking a high-resolution digital pictures while simultaneously scanning the retina and optic nerve for diseases.

This screening allows us to detect glaucoma, retinal and macular pathologies far earlier than ever before.

This cutting edge technology is fast, easy, and usually does not require dilation.

We offer a screening with this instrument for \$35.

This testing should be performed in greater detail on patients with glaucoma, glaucoma suspects, diabetic ocular complications, macular degeneration, other ocular pathologies, and will be covered by your medical insurance (we will advise you if your insurance will cover this procedure).

**I DO** want this testing done: \_\_\_\_\_ (Please initial)

**I DO NOT** want this testing done: \_\_\_\_\_ (Please initial)

You may have a colored copy of the results if you wish.
